ICT – Intent

At Denewood and Unity Academy, we recognise that ICT is an important aspect of our everyday lives and embed these skills throughout the curriculum. These include:

- Science - Pupils research and input and analyse experimental data.
- Maths – Pupils handle and analyse mathematical data using Microsoft Excel
- Creative Arts- Pupils learn how to create and edit images in a graphical editing suite. Pupils also learn how to create and edit sound tracks in a sound editing suite.
- English – Utilising Microsoft Word and the tools to support spelling and grammar.
- Topic- Pupils research and create posters and presentations on various topics.

We want all pupils to leave Denewood as responsible digital citizens who have a love of learning and who are ready to explore their future potential.
